

LXS-M STILE ENDS: COMPATIBILITY

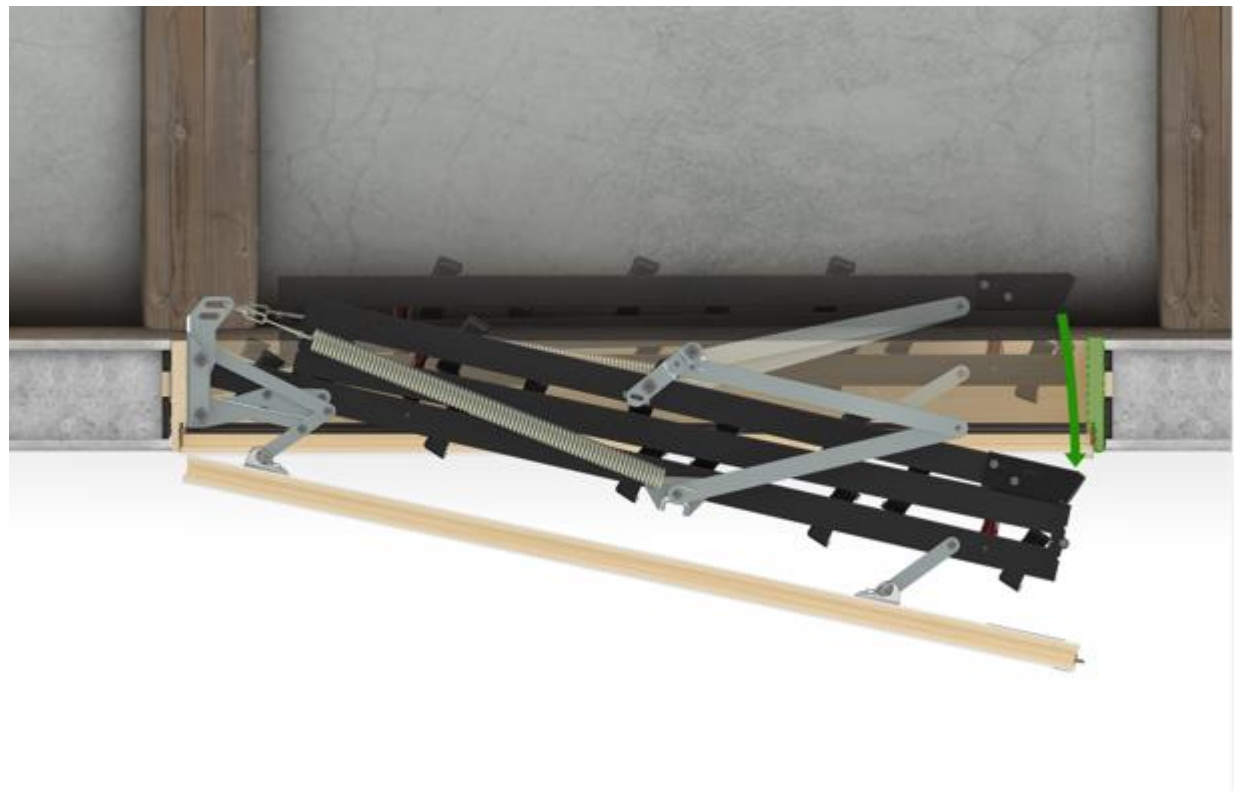

Stile ends in a colour similar to RAL 7022 compatible with selected models of metal loft ladders. They are an alternative to the LXS model, giving the option to adjust the length of the cut ladder. In addition, they protect the ladder stringers against damage. The rubber cover prevents the floor from scratching and increases the comfort of operating the loft ladder.

The maximum extension of stile ends depends on the room height (Fig. 1) and loft ladder size (for smaller box lengths, too extended stile ends will collide with the box, preventing the loft ladder from closing, Fig. 2).

Figure 1. Maximum room height

Figure 2. Swing space of the loft ladder equipped with the LXS-M stile ends

The table below presents the maximum room height that can be achieved by extending the ladder using the LXS-M stile ends. Models and sizes not included in the table are not compatible with the LXS-M stile ends.

Model	Hmax [cm]
LMS : 8612__	
... x 120/280 cm	288
LMK: 8614__	
... x 120/280 cm	288
... x 130/280 cm	289
... x 140/280 cm	289
... x 130/305 cm	314.5
... x 140/305 cm	314.5
LMP: 8693__	
... x 144/366 cm	366
LMF60: 869J__	
... x 120/280 cm	280
... x 130/280 cm	286
... x 140/280 cm	286
...x 130/305 cm	310
... x 140/305 cm	310
... x 144/360 cm	360

*The table does not include models that are equipped with the LXS-M stile ends as standard, eg. LME Energy Efficient and LMT Super Thermo.
