ECO-FRIENDLY
ALUMINIUM CLAD-PLASTIC WINDOWS

GO GREEN

The green colour present in the FAKRO logotype is with us since the very beginning of the company, while ecology associated with it is an aspect that permeates all fields of the activities taken.

We design, plan and produce with care for the natural environment. Offering eco-friendly and energy-efficient products is in the DNA of FAKRO. We ensure that every process, every action and every decision we make is always accompanied by concern for the comfort and healthy life of future generations. We have now closed all these activities in this one important philosophy of GO Green.

WHY FAKRO ECO-FRIENDLY

Our PVC roof windows are eco-friendly products. The frame profiles are made of as much as 63% recycled material. In addition, materials used to manufacture windows such as **glass, PVC profiles, aluminium and steel components can be reused virtually in 100%.**

Applying recycled components in the production process significantly cuts down the amount of waste and helps reduce the need for fossil fuels such as crude oil.

WHY PVC WINDOWS?

Windows ensure an abundance of natural light within the attic space, which makes us happy to be there, feel good and want to live.

They stand behind safety and peace of mind for many years to come. Windows are durable and resistant to adverse weather conditions. The material they are made of does not absorb moisture and does not need to be painted, while the glass is covered by a lifetime hail warranty.

Windows prevent energy loss in the winter, which allows us to save on heating. They come with triple-glazed units, while their installation with Thermo flashings improves the heat transfer coefficient by up to 15%.

They can be fitted in any room, including living rooms, bedrooms, children's rooms and spaces with elevated humidity levels such as kitchens and bathrooms.

They work well both for new investments and as replacement windows. Popular roof windows can be replaced without harm to the lining, while the whole process is quick and easy.

CHOOSE YOUR COLOUR

Our windows can be perfectly matched to any interior. They are available in **classic white** as well as in attractive veneers such as **pine and golden oak** that resemble natural wood.
